### **MSCA ADDS FIVE NEW STARS**

ROCKVILLE, MD—The Mechanical Service Contractors of America (MSCA) is pleased to announce that five more contractors have qualified as MSCA STARS bringing the total number of STAR-Qualified Contractors to fifty-two. Contractors designated as MSCA STARS have proven that they are an experienced service contractor, employ the best trained and most qualified workforce including UA STAR certified technicians, maintain a superior safety record, offer outstanding customer service, and focus on continuing education and training for all employees. These qualifications have been confirmed and verified by MSCA, the nation's leading organization representing commercial and industrial heating, ventilating, air conditioning and refrigeration contractors and the NITC (National Inspection, Testing and Certification), an ISO 9001 and ANSI accredited certifying organization. When a building owner or operator hires a contractor with the MSCA STAR designation, they are ensured that their buildings' systems are in the hands of the most qualified and competent contractors available.

The five newly qualified MSCA STAR contractors, along with the 47 MSCA STARS previously qualified, represent some of the best, most committed contractors in the industry. Each of these companies has proven that they have

attained or exceeded the high standards required for MSCA STAR qualification.

The five newest MSCA STARs include:

Allison Mechanical, Inc., Redlands, CA

GEM Service Group, Walbridge, OH

Tweet/Garot Mechanical Inc., Green Bay, WI

W. J. O'Neil Company, Livonia, MI

W. W. Gay Mechanical Contractor, Inc., Jacksonville, FL

The MSCA STAR Contractor Qualification Program began in 2004. To qualify for MSCA STAR status, a contractor must complete a detailed application and provide evidence that they meet or exceed the stringent standards set by MSCA. To qualify a contractor must have a proven track record in the HVACR industry; employ UA STAR certified technicians, have a documented safety and health program and an outstanding safety record, provide on-going education to all employees, have an established tool inventory system, utilize photo ID cards for security reasons and offer outstanding customer service.

For additional information on MSCA STAR qualification and a complete listing of our 52 STARs, visit [www.msccstar.org](http://www.msccstar.org) or contact Barbara Dolim at ([bdolim@mcaa.org](mailto:bdolim@mcaa.org)).

Since 1975, the Mechanical Service Contractors of America has provided large and small heating, ventilation, air conditioning, and refrigeration service contractors with management and marketing tools, training and education programs, and government and labor relations. MSCA has more than 1,100 contractor members and is a subsidiary of the Mechanical Contractors Association of America.
